iCardTrick for iPhone

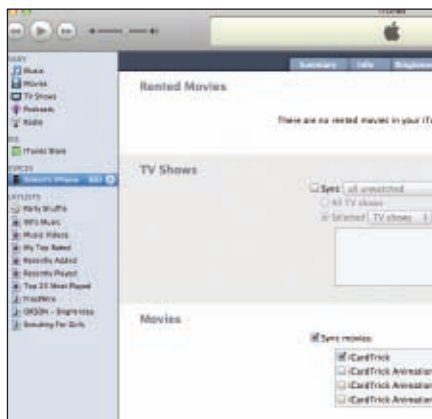

This is a cool card trick you can perform with your iPhone. It can be performed a couple of ways depending on your skill level.

THE EFFECT: You ask a spectator to pick a card and memorize their selection. You return their card to the pack and give it a shuffle. You introduce your iPhone and proceed to throw the cards onto the iPhone's screen. Amazingly the spectators card appears on your iPhone, all be it in a miniaturized form! You show that their selected card is really on the screen because it is actually **BEHIND** the home screen icons. You explain that getting the card back out again is the hardest part. With a flick of your wrist the chosen card jumps above the icons. For the astonishing finishing move you shake the iPhone and the spectators miniaturized card actually falls out of the iPhone.

THE SECRET: You are going to need to learn a simple card force so that the spectator chooses the 5 of hearts! More about this later. You are supplied with a very realistic video for your iPhone that pretends to be your home screen. Once played you can see how the effect pans out. You have 5 seconds before the forced card appears on your screen. Another five seconds before it jumps above the icons and a further five seconds before the card shoots off the side of the screen.

You will need to watch the video a few times to get to know the timing exactly, eg When to spring the cards onto the iPhone. To help there is a small change in the camera icon which signals 1 second before the next step will occur. This will be your cue.

So how do you get the spectator to select the 5 of hearts? You have to force it on them. There are many ways to force a card on a spectator. I will not go into detail here. However you can learn an easy card force with my **FREE Card Tricks eBook** that comes with this effect.

TIP: If the icons on your home screen are in a different arrangement to the video it is useful to make them the same to blend seamlessly before and after the effect.

Loading iCardTrick onto your iPhone: Take the downloaded iCardTrick.m4v file and drag it (or import it) into your iTunes videos.

Some computers may give you an error message if you try to play the file because it's really just made to be played on iPhones. Put your iPhone in the dock until the above sync window shows up. Go to the video tab. Check the box that says iCardTrick.m4v. Sync your iPhone. If you don't know how to do that check your manual.

Before the illusion you also need a miniature 5 of hearts card taped with a tiny piece of double sided stick tape on the back of the iPhone. You can get these small cards from Christmas crackers or joke shops. As soon as you have forced the card on your spectator return it to the deck and give it a shuffle. Pick up the iPhone click the home button click the iPod button (bottom right). Click 'videos'. Select iCardTrick. You'll then be playing the video.

You'll see a fake home screen (all part of the video) for 5 seconds. Now show the screen to your spectator, wait a few seconds then start to spring the cards onto the iPhone. The spectators card will appear on the iPhone. After another 5 seconds it will jump above the icons. Then another five seconds it will shoot off the side of the screen. As it does this flick the small card off the back of the iPhone with your finger into your hand. Give that to your spectator to examine, then secretly press the home screen button on the iPhone to exit the video.

TIP: If you find the last part of the trick too hard you could simply finish the effect when the card appears on the iPhone. It still looks cool. However try and do the whole effect for the best reactions - Have fun with it!

Finishing up

Well that's it for this eBook, I hope you enjoyed learning the effect but please remember to Practice, Practice, Practice before performing :-)
